

PLANT - FIRE

Tuesday, August 11, 2026

Afternoon, everyone-

There was an electrical fire this morning in the paint shop at the plant. The Belvidere Fire Department was called in to handle the issue. The members that were at the plant were evacuated outside, then moved in to the North Body Shop. A couple of members from the Fire/Security team were treated at the plant for smoke inhalation; no other injuries were reported. The fire caused a power outage to several areas in the plant, including the Administration building. Power is now back on but the computer systems are still down. This will impact anyone trying to contact the Benefits Reps today.

As we get more information, we'll get it out to everyone.
